WALL and Gough, I came down from Nanaimo to a dicit aid for the bistressed Families who have been compelled to appears through us to the sympathies of the Public in the present crisis, broaght about by what is called the Miners strike, but which in reality is no such thing. This I could easily prove. At the present time, however I simply wish to state that my object in coming to Victoria was to endeavor to collect some mean a to alleviate the distress, which I know exists among the families of the miners of Nanaimo. My applications for this purpose have been responded to in the Spirit of Liberality, Characteristic of Victorians; But I regret to add that I have a been challenged as "The head and front" of the Miners' Strike. I desire to disable the public mind of this idea by stating that I was absent in Man Francisco when work in the coal mines was suspended, and have never attended any of the meetings upon the subject in dispute.

PUGET SOUND ITEMS .- From our Puget The Estimates for 1871 have been passed Sound exchanges we glean the following through Committee, and the supplies granted summary of news: Joshua Brown who died that is required is the formality of passing a Supply Bill through three readings to give the votes on the Estimates the highest level. the votes on the Estimates the highest legal others, forming a Company to build conneccanction. That doubtless will be done without the least dissent. In fact the independent portion of the elected members, that is, all except Messes. Helmcken and Carrall, have regarded it as useless, and view the matter still in the same light, to make a strong stand against any portion of the Estimates. For motivith standing the country has the name of possessing a Representative Legislature, yet it is no more representative practically than it has previously been. The Council is so constructed that the six nomlness and the member for Cariboo and Victoria constitute the Legislature. The other members for all practical purposes might just as will have the Legislature. The other members for all practical purposes might just as will have remained at home. Experience has shown that they are powerless, were they united; and that it would be a waste of labor to oppose even objectionable portions of the Estimates. For the whole power of the Council is vested practically in the members of the Executive Council and the nominees in the House, and as they had framed the Estimates, so they really voted them. Practically the doctrine that taxation and representation go together is a perfect nullity here,—and neither the local nor Imperial Government are deserving of any degree of credit for the present constitution,—rather the re-

erable degree contributed to reduce the desire for retrenchment. The high salary paid to the Governor has been a general source of complaint and a bone of contention in every session. But the near approach of Confederation, with the certainty of Canada becoming responsible for the Governor's salary has ferever removed that subject from the arena of local politics. The salaries too of certain heads of departments have always been considered too high. But as the office of Collector of Custons with his whole department will be transferred to Canada, there remained but the Colonial Secretary, Surveyor General, and Attorney General to consider; and as it is proposed to introduce Responsible Govergovernent early, it was not deemed advisable to make any attempt to cut their salaries down. MAGIC SOAP.

Directions for Using Robinson's Magie Scap for doing a Large Family Washing in Two Hours, of Five or Siz Dozen Preces Hours, of Five or Siz Dozen Pieces

1. Cut up fine a bar of the Soap, and put one-ha of it into your boiler with sufficient water to cover your white clothes to be washed, and let the Soap dissolve; then put your clothes in, stirring them, and let them just come to a boil; then pour out clothee and water into a tub and let them soak twenty or thirty minutes, stirring them round in the tub occasionally to loosen the dirt. Such articles as collars, wristbands or any ar icle very dirty, should be rubbed through the hands a little while soaking in order to thoroughly loosen the dirt before boiling.

2. While your clothes are soaking put the other half of your cut Soap into your holler, with sufficient clean water to boil, and let it be heating. After your clothes have soaked wring them out well and put into your boiling water, and let boil from 5 to 10 minutes; then rinse, blue and hang out to dry. If the above directions are followed, we will guarantee your clothes clean and white.

3. For your colored and woollen clothes was the

followed, we will guarantee your clothes use the same water you soaked and boil your white clothes with, only heating it up again, and pour it over your colored and woollen clothes, and let soak the same as your white clothes, also rubbing them through your hands while soaking, if very dirty. Then rinse in clear water, warm a your hands will bear, and you will thus accomplish a large washing in two hours.

By cutting up a bar of this Soap into two gallons water, and let boil until thoroughly dissolved, and then leave to cool, you will have two gallons of beautiful SOF! SOAP, as good as Common Soap for general house pur poses.
